Assistant thebweb manager working on various projects to revamp the store's eCommerce website and expand reach to customers across the world.
- Added nearly all the store's general merchandise inventory online within a year.
- Initiated workflows to keep the website running smoothly.
- Created and mentored a team of 4 student employees to assist with website inventory management.

Sales Associate   2013-2014
Served as a cashier, sales floor representative, customer service representative and stocker.

PROJECTS

Playlist Generator
- Link to GitHub: https://github.com/MadelineCowell/API-Playlist-Generator
- Link to Deployed Project: https://noracurcio.github.io/Music-API-Group-Project/
- This application allows the user to search for music, create and organize searched songs into a playlist, that can then be exported. This unique playlist generator features a taco theme and TacoTV.
- Utilizes the Deezer and Giphy APIs.

Travel Blog
- Link to GitHub: https://github.com/MadelineCowell/Couchsurfers-Travel-Blog
- Link to Deployed Project:
- This application features a miniblog allowing users to create an account. Once logged in, users can create, edit and delete blog entries. Additional features allow users to stay on top of travel trends and more!
